Summary

- Web Content Developer at RBC Capital Markets handling **~10 website change requests a day** from a shared team inbox; **2+ years** of experience (2024–2026) with Excel trackers, records and reporting tools at a global investment bank and at agencies in Canada and Portugal.
- Created and maintained Marketing's Excel tracker of **~800 employee profiles** marked for removal.
- Work was rarely sent back for revisions after review in Asana due to high accuracy.
- Cut website content searches from hours or days to **under 1 hour**.
- Built an email-template tool used across a **9-person company** that pulls employee details from Zoho automatically, replacing manual copying.

Tools

Spreadsheets: Microsoft Excel (XLOOKUP, VLOOKUP, data validation, conditional formatting), Google Sheets, CSV files

Other tools: Asana, OpenText TeamSite, WordPress, Shopify, Google Drive

Professional Experience

RBC Capital Markets | Bedford, NS

Web Content Developer | May 2026 - Present (ends Dec 2026)

Global investment banking business of Royal Bank of Canada with 7,648 full-time equivalent staff, 55 offices in 16 countries and C$14.4 billion in revenue in fiscal 2025.

- Member of the web content team within Digital Technologies (**~80–90 people**) in Quantitative Technology Services (QTS), reporting to a Web Content Developer; responsible for content updates across **4 company websites**.
- Handled website change requests from the team's shared inbox, **~10 a day**, and implemented the changes as they came in during the day; some bulk requests involved **hundreds of individual changes**.
- Tracked tasks in Asana; work was rarely sent back for revisions after review.
- Published and updated **~60 articles** in the first 3 months, about 5 a week.
- Created and maintained Excel trackers covering **~800 employee profiles** marked for removal; supplied the files to Marketing.
- Turned website profile data into JSON, CSV and Excel files for tracking and reporting. RBC analytics demo
- Cut the time needed to find website content from hours or days to **under 1 hour** by saving pages for repeat searches; one recent scan covered **3,500 pages**.
- Moved from content publishing to building internal tools **within 3 months**, including a website and marketing platform built for marketing, operations, accessibility and web content staff.
- Collaborated with **20 other developers** on an internal tool for onboarding clients.

Young Drivers Academy | Leiden, Netherlands (remote)

Software/Web Developer (Freelance) | Jul 2025 - Present

Dutch go-karting school providing driver coaching, race support and kart maintenance.

- Set up invoice creation and approval, with PDFs filed in Google Drive and emailed to customers.
- Replaced manual event registration records with online signup and organized participant data.
- Built a customer management system used by 50 active users.
- Set up 4 access levels for parents, drivers, mechanics and administrators.

Apollotec.pt | Coimbra, Portugal

Full-Stack Developer | Summer 2025

Portuguese tech and marketing agency with a team of 9 people during the 2025 engagement.

- Built an email-template tool independently for use across the **9-person company**.
- Made the tool fill employee details and job titles from Zoho automatically, replacing manual copying.

ETPZP | Leiria, Portugal

DevOps/Full-Stack Developer | 2024 - 2025

Portuguese technical and vocational school.

- Built an emergency text-messaging system for school staff independently, with contacts, message history, scheduled sending and an admin dashboard.
- Connected sign-in to existing school staff accounts and installed the system on a school-owned computer.

Hope Media House | Vancouver, BC

Frontend/WordPress/Shopify Developer | Summer 2024

Vancouver web, marketing, and software agency with a team of 9 people during the 2024 engagement. Served ~7 clients, including enterprise clients.

- Reported directly to the owner and built WordPress features and Shopify themes for **4 clients**: Baden, Beautifi, DonChendo and Sitings.
- Turned designers' mockups into web pages and built Sitings.ca's live property map (sitings.ca/property), which lists **274 available and completed properties** as of November 2026.
