Summary

- Web Content Developer at RBC Capital Markets maintaining **4 websites**, including rbccm.com and rbcis.com; **2+ years** of experience (2024–2026) building and updating websites for a global investment bank and for web agencies in Canada and Portugal.
- Published **~60 articles** in OpenText TeamSite in 3 months and handled **~10 website change requests a day**; work was rarely sent back for revisions after review in Asana.
- Built XSL components that pull TeamSite content records automatically, and an internal platform that marks accessibility, SEO and performance issues directly on each page.
- Built the live property map for Sitings.ca with search filters and AJAX updates; it lists **274 properties**.
- Built WordPress features and Shopify themes for **4 agency clients** from designers' mockups.

Tools and Languages

Website tools: OpenText TeamSite, WordPress (block editor, custom post types, Advanced Custom Fields), Shopify (themes and store admin)

Languages: HTML, CSS, JavaScript, PHP, XML, XSL

Website checks: axe-core, Lighthouse, SEO metadata, content migration

Other tools: Microsoft Excel, Google Sheets, Asana

Professional Experience

RBC Capital Markets | Bedford, NS

Web Content Developer | May 2026 - Present (ends Dec 2026)

Global investment banking business of Royal Bank of Canada with 7,648 full-time equivalent staff, 55 offices in 16 countries and C$14.4 billion in revenue in fiscal 2025.

- Member of the web content team within Digital Technologies (**~80–90 people**) in Quantitative Technology Services (QTS), reporting to a Web Content Developer; maintained content across **4 websites**: rbccm.com, rbcis.com and 2 internal sites. RBC analytics demo
- Published and updated **~60 articles** in OpenText TeamSite in the first 3 months, about 5 a week.
- Handled website change requests from the team's shared inbox, **~10 a day**, and implemented the changes as they came in during the day; some bulk tasks involved **hundreds of individual updates**.
- Tracked tasks in Asana; work was rarely sent back for revisions after review.
- Built XSL components that pull TeamSite content records (DCRs) automatically, with pagination, limits and XML queries.
- Built **2 homepage campaign features**, a popup and a banner, for the internal site that staff see when opening a new browser tab; added rules to choose which appeared and connected the forms to OpenText TeamSite.
- Moved from content publishing to building internal web tools **within 3 months**, including an all-in-one website and marketing platform for the Global Head of Digital Technologies; put the first version into the test environment in **2 weeks**.
- Added axe-core and Lighthouse checks for accessibility, SEO and performance to the platform; each page is rebuilt visually with issues marked on the affected elements and linked to a fix guide.
- Cut website content searches from hours or days to **under 1 hour** by saving pages for repeat searches; one recent scan covered **3,500 pages**.
- Created and maintained Excel trackers for Marketing covering **~800 employee profiles** marked for removal.

Young Drivers Academy | Leiden, Netherlands (remote)

Software/Web Developer (Freelance) | Jul 2025 - Present

Dutch go-karting school providing driver coaching, race support and kart maintenance.

- Built and maintain a customer management system used by 50 active users.
- Replaced manual bookeeping of event registration records with online signup and organized participant data.
- Managed customer, event and invoice records, with PDFs filed in Google Drive.
- Set up 4 access levels for parents, drivers, mechanics and administrators.

Apollotec.pt | Coimbra, Portugal

Full-Stack Developer | Summer 2025

Portuguese software and cloud services agency with a team of 9 people during the 2025 engagement.

- Built and launched an email-template app independently for use across the **9-person company**.
- Connected the app to Zoho so employee details and job titles filled automatically, replacing manual copying.

ETPZP | Leiria, Portugal

DevOps/Full-Stack Developer | 2024 - 2025

Portuguese technical and vocational school.

- Built an emergency text-messaging web app independently, with an interface in English and Portuguese.
- Connected sign-in to existing school staff accounts and installed the app on a school-owned computer.

Hope Media House | Vancouver, BC

Frontend/WordPress/Shopify Developer | Summer 2024

Vancouver web and software agency with 8 employees during the 2024 engagement. Served ~7 clients, including enterprise clients.

- Reported directly to the owner and built WordPress features and Shopify themes for **4 clients**: Baden, Beautifi, DonChendo and Sitings.
- Turned designers' mockups into web pages that adjust to different screen sizes.
- Built Sitings.ca's live property map (sitings.ca/property) as the main developer using PHP, JavaScript, AJAX, WordPress custom post types and Advanced Custom Fields.
- Added Google Maps, search filters, grouped map markers and property cards that update through AJAX without reloading the page; the map lists **274 available and completed properties** as of November 2026.

Education

Dalhousie University | Halifax, NS

Bachelor of Computer Science | Expected 2029 | GPA 4.24/4.3

Languages: German (native), English (C2), Portuguese (B2)
